## How to connect

---

Please connect to Power Supply in the following order.

※ Please use the supplied extension cable only.

## How to install X-Mount

---

- 1 Insert X-Mount in the rear corner of LED Mat clips.
- 2 Install X-Mount on a stand or tripod after firmly fitted with LED Mat.

## How to use Controller

### ① How to use buttons

**To Set LOCK Mode :** Press and hold 'MODE'  button for 2~3 seconds to enter 'LOCK' Mode, on the LCD display window 'LOCK' displays and is set. (Note : when 'LOCK' mode is set, CCT and DIM can't be changed)

**To Unlock :** Press and hold 'ADJUST'  button for 2~3 seconds. 'LOCK' disappears from the LCD display window and is released.

**To Set QUICK Mode :** Short-press 'MODE' button once, on the LCD display window 'QUICK' displays.

Press Q1  button to 3200K or Q2  button to 5600K (Default value). At this time, DIM and CCT can be adjusted.

How to adjust/set desired CCT value : In 'QUICK' mode, press 'ADJUST' button and CCT value is blinking. Please turn CCT dial to select CCT value and press 'ADJUST' button to set.

Return to default condition : Press and hold Q1  button and press Q2  button.

**To Turn QUICK Mode Off :** To exit 'QUICK' mode, press the 'MODE' button once, 'QUICK' disappears from the LCD display window. And 'QUICK' is released and transfer to DMX Address setting mode. (At this time, CCT is automatically going back to the previous value used in normal mode.)

**To Set DMX Address :** Press 'MODE' button twice, on the LCD display window 'DMX' appears and address is blinking. At this time, set DMX address using Q1  / Q2  button. Please press 'ADJUST' button to save the address, then it switches to normal mode. (Note : when it is connected with DMX console, DMX mode is automatically set and the following is how to set DMX address. – Press 'MODE' button once. When address is blinking, please set the address using Q1  / Q2  button and press 'ADJUST' button to save the address.)

**\* Sequence of Mode Conversion** ( Normal mode → QUICK mode → DMX address setting mode → Normal mode )

- ② Turn on/off with ON/OFF switch on the left.
- ③ Adjust color temperature with the left CCT dial. The value from 2700k to 6500k will be displayed on the LCD display window.
- ④ Connect the Light output cable (2m) to light output port, then connect the cable to LED Mat.
- ⑤ Adjust brightness with the right DIM dial. The value from 0% to 100% will be displayed on the LCD display window.
- ⑥ When using DMX please, connect the cord of DMX Console. If DMX connection is normal, green LED lamp is on under the DMX Input connector.
- ⑦ Connect DC power input connector to the controller when using the power supply.
- ⑧ Connect DMX control cord to other LED lights.
- ⑨ Available to use battery pack with attached V-Mount or Gold-Mount (Optional) instead of power supply.

## How to install Softbox(FLSF, FLES)

FLSF (Softbox With Quick Frame)

- ① Assemble Quick Frame and put Softbox on it.
- ② Face close to the corners of LED Mat to simply attach by magnets.

FLES (Easy Softbox)

- ① Softbox can be installed easily by using hook and loop fastener.
- ② Secure softbox with side release buckle.

## How to install Clamp Shoe

- ① Tighten Clamp Shoe to a Clamp(Optional) with screws.
- ② Mount Controller to Clamp Shoe.  
(When using a light stand, please use Controller after mounting to Clamp Shoe for safety.)
